

What is *your* time worth?

For some of us, our time is worth a lot, eliminating interest on debts, loans, mortgages.

Steve shaved off 14 years off his 28 years remaining mortgage term and is saving \$35,000. Working his new program an average of 20 minutes a month for 16 years.

His time is worth \$547/hour. (\$35k divided by 16 years x 12 months, and he is investing 20 minutes per month to be on his computer using the program. = 1 hour every 3 months)

John and his wife Josephine are on track to turn their 26 years remaining mortgage term into less than 12 years and save \$70,000. Actively utilizing their new program for 20 minutes a month, 47 hours over the duration of their now 11.8 plan . . . **their time is worth \$1,489/hour.**

Kathy & Frank will be saving over \$211,000 and 14 years off their 27.3 years remaining mortgage term. Using their new program for 20 minutes a month, 53 hours over the duration of their 13.3 year plan . . . **their time is worth \$3,980/hour.**

Kristine and Bob will be saving \$490,000 and 16 years off their 28 years remaining mortgage term while on their new program. Following it for 48 hours over the duration of their 12 year plan . . . **their time is worth over \$10,200/hour.**

There are tens of thousands of other *my valuable time* testimonials all over the country.
